- Marketing aur helper badhne par **fixed cost ₹3,000-3,500** tak ja sakta hai (roadmap mein shamil)

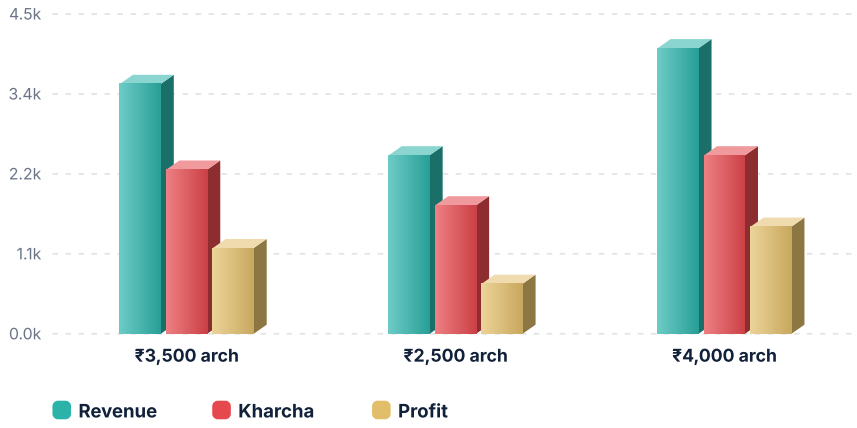

ECONOMICS

Per-event economics

₹3,500 ka ek arch bechne par **kitna profit bachta hai**? Pehle costs ghataiye.

Customer deta hai	−	Kharcha	=	Profit (1 event)
₹3,500		₹2,300		₹1,200

3D chart: alag-alag rates par

📌 KEY POINTS

- Profit margin **~34%** hai; aapki apni mehnat iske upar alag hai.
- **₹1,800 jaise low rate** par margin bahut kam bachta hai.
- Jitna **premium design**, utna bada ticket size.

ECONOMICS

Payback kab milega?

Break-even ka matlab hai initial investment wapas recover karna. Formula: **Setup ÷ per-event profit**.

Profit / event	Lean (₹9,068)	Service-ready (₹23,164)
₹700	13 events	34 events
₹1,000	10 events	24 events
₹1,200 (base)	**8 events**	**20 events**
₹1,500	7 events	16 events
₹2,000	5 events	12 events

Base roadmap mein

Fixed costs jodne par **Level 2 ka investment ~7 mahine** mein wapas aata hai (page 24). Low-booking scenario mein **12 mahine mein bhi recover nahi** hota (page 26); isliye pehle Level 1 se shuru karein.

⚠️ **REALITY CHECK**

- Ye sirf **initial investment recover** hone ka hisaab hai. Bookings aayengi ya nahi, wo aapki marketing par depend karta hai.

OVERVIEW

How to use this plan

This guide is written so that a complete beginner can follow it step by step. Every page has short points, 3D visuals and plain numbers. Use the links on the contents page to jump to any section.

📌 **4 KEY RULES**

- Practise with **1-2 test arches** before making a larger investment.
- **Find customers first, then scale stock.** Do not buy large quantities without bookings.
- Confirm the machine's **exact price and a live demo** with the seller (page 50).
- All numbers are **illustrative**, not guaranteed. Verify against your city's rates (Sources 68).

Machine and cash flow: this plan covers both (3D illustration).

SNAPSHOT

BASICS

What is a balloon arch business?

Birthdays, weddings, baby showers and shop openings all need an **attractive photo spot**. You go to the venue, install a balloon arch, and are paid for that service.

Booking
customer enquiry

→

Inflate
with pump / machine

→

Build the arch
mount on frame

→

Payment
advance + balance

Business model

You run a **service**, not a shop. You bring the balloons and frames, install them at the event and charge for the service. No warehouse or rent is needed at the start; a corner of your home is enough.

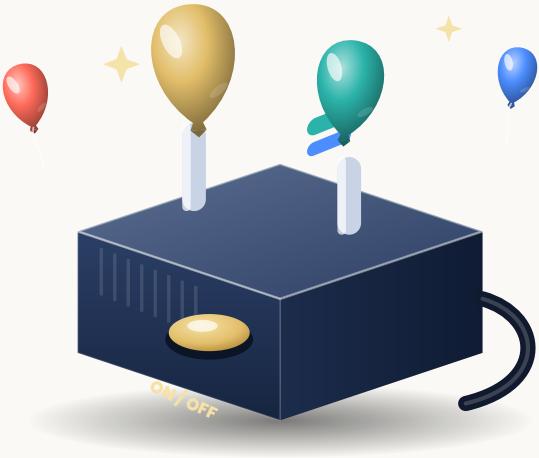

Why this business?

- **Low investment:** can start from ₹9,000
- **Home-based** operations, no rent
- **Year-round demand** from birthdays and weddings
- A skill built by practice; no degree required

BASICS

What the reel's machine does

The machine **inflates several balloons at once**, which **saves time**. Inflating by mouth or hand pump takes much longer.

✓ The machine does

- **Inflates balloons quickly**
- Less fatigue, **faster work**

✕ The machine does not

- **Build the arch by itself**
- Design, colours and fitting are **still your work**

⚠️ **IMPORTANT**

- An ordinary **₹666-900 dual-nozzle pump** and the reel's **multi-balloon machine** may be different products.
- Before buying, confirm the **demo video, warranty, voltage, balloon sizes and price** with the seller.

MARKET

Target customers

These are the people who pay for an arch. Focus on **3 segments** first, then expand.

Birthdays

Home or hall arch, name balloons

Baby shower / naming

Pastel arch, welcome board

Wedding, haldi, mehendi

Entrance arch, photo corner

Shop opening

Brand-colour arch, pillars

Schools / offices

Stage and gate decoration

DIY customers

Ready-made garland kits

🧭 **WHERE TO FIND THEM**

- WhatsApp Status, Instagram Reels, local **Facebook groups**
- Tie-ups with **cake shops, photographers, banquet halls and event planners**
- **Reviews and referrals** from happy customers

MARKET

Packages and pricing

Quote with a **photo, balloon count and inclusions**. The **test rates** below should be adjusted to your city.

Package	Includes	Test rate
🎈 **Starter arch**	1 simple arch, 2-3 colours, local venue	**₹1,800-2,800**
🎂 **Birthday corner**	Arch + small backdrop + floor bunches	**₹2,800-4,500**
📸 **Theme photo corner**	Arch + ring/frame + name foil + styling	**₹4,500-7,500**

🏪 **Shop opening**	Entrance arch or 2 pillars, brand colours	**₹3,500-7,000**

📌 **HOW TO SET YOUR PRICE**

- **Balloons + material cost** + travel + helper
- + **your time** + profit margin
- Never quote a premium design at a basic-arch rate.

Reference listings: BalloonDekor, Funtook, mytribe (₹1,499-₹11,499 range). These are test rates, not exact local quotes.

PROCESS

The business process step by step

From booking to payment: every event follows these **10 steps**.

STEP 3

Send photo + quote

Design photo, balloon count, inclusions, rate

STEP 4

Collect advance (30-50%)

By UPI. Lock the date and write the cancellation policy.

STEP 5

Material count

Balloons + 10% extra, frame, tape, tools, extension

✍️ **CAPTURE IN THE BOOKING FORM**

PROCESS

The business process step by step

(continued)

STEP 6

STEP 7

Event day: venue check

Wind, power point, floor, permission. Then set up the frame

STEP 8

Inflate and build

Inflate with the machine/pump, attach balloons to the strip following the colour pattern

STEP 9

Photo + video, show the customer

This becomes your portfolio. Take photo permission

STEP 10

Balance payment, review

Record expenses (job sheet page 69), ask for a Google/WhatsApp review

⏱️ **EVENT-DAY TIMELINE (example)**

- Arrive **2 hours early**
- Arch build: **45-90 min** (faster with practice)
- Ready **30 min before** the customer arrives

INVESTMENT · SET COST

Initial investment: 3 levels

This is the **one-time set cost** (excluding the machine). Pick the level that fits your budget.

LEVEL 1

Lean start

₹9,068

1 pump, 1 frame, 1,000 balloons, tools. For testing.

LEVEL 2 ⭐

Service-ready

₹23,164

2 frames, stock, props, marketing. A serious start.

LEVEL 3

Expanded

₹50k–1L+

Multiple frames, premium props, lights, team. After demand is proven.

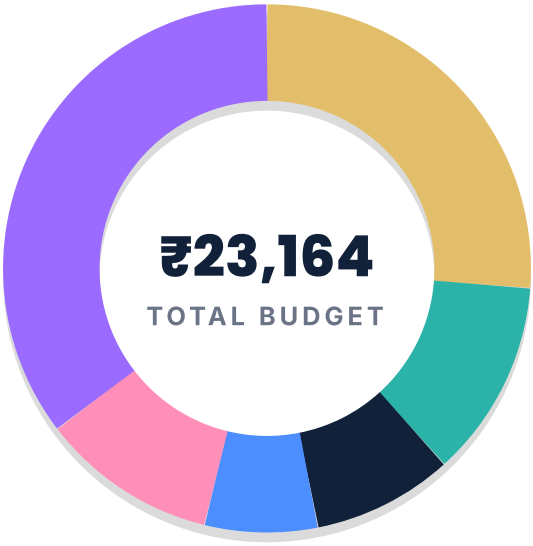

📌 KEY POINTS

- Biggest costs: **frames** (₹1,669-₹4,399) and **balloon stock**
- The **machine is added separately** (page 50)
- Test with Level 1; move to Level 2 once bookings arrive

INVESTMENT · SET COST

INVESTMENT · SET COST

Lean start: ₹9,068

Not sure about demand? Start with a **small setup**. Run 2-3 events, then scale.

Pump	**₹800**
Frame 9 ft	**₹1,669**
DIY kit	**₹499**
Balloons (1,000)	**₹2,800**
Tape / ribbon / foil	**₹1,000**
Tools	**₹800**
Branding	**₹500**
Buffer	**₹1,000**
TOTAL	**₹9,068**

🎯 **THE LEAN-START PLAN**

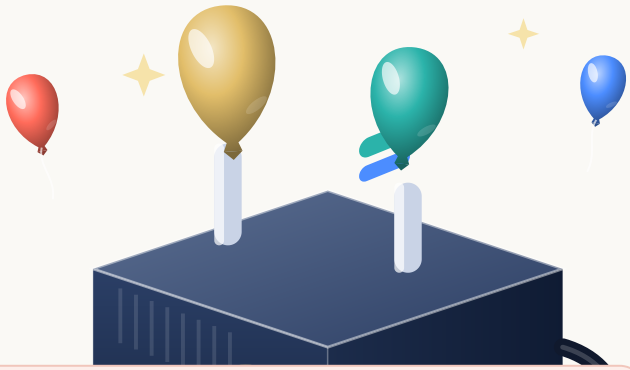

- **Practise 5 times** first (at home or for friends)
- Create **3 sample photos/videos**
- Then **3-5 paid events**, followed by Level 2

INVESTMENT · SET COST

The reel's machine price

The reel's multi-balloon machine has **no fixed price here** because different sellers quote different prices. It must therefore be **added to the setup separately**.

🧾 **ASK THE SELLER**

- Exact **model and price**
- A **live demo video**
- Warranty + **after-sales service**
- Which balloon sizes it supports
- Voltage, shipping, GST bill

Investment formula

Total start-up investment = Setup (₹9,068 or ₹23,164) + Machine price
Payback events = Total investment ÷ per-event profit (₹1,200)

💡 **TIP**

- Get quotes from **3 sellers**; choose the **most reliable**, not the cheapest
- Test bookings with Level 1 first; the machine can be added later

INVESTMENT · MONTHLY

Monthly running expenses

These costs apply **every month, whether or not you have events**.

Fixed: every month

Phone + internet	**₹400**
Marketing (boosts, printing)	**₹1,000**
Repairs / frame maintenance	**₹300**
Miscellaneous	**₹300**
Total fixed (early months)	**₹2,000**

Variable: per event

Latex balloons (~200 pcs)	**₹560**
Foil / accents	**₹240**
Tape, strip, glue dots, wastage	**₹250**
Travel (fuel / auto)	**₹400**
Helper (setup + teardown)	**₹700**
Payment fee / contingency	**₹150**
Total (on a ₹3,500 arch)	**₹2,300**

📌 **NOTE**

- **Your own salary/time** is not included in these costs
- With more marketing and a helper, **fixed cost can rise to ₹3,000-3,500** (included in the roadmap)

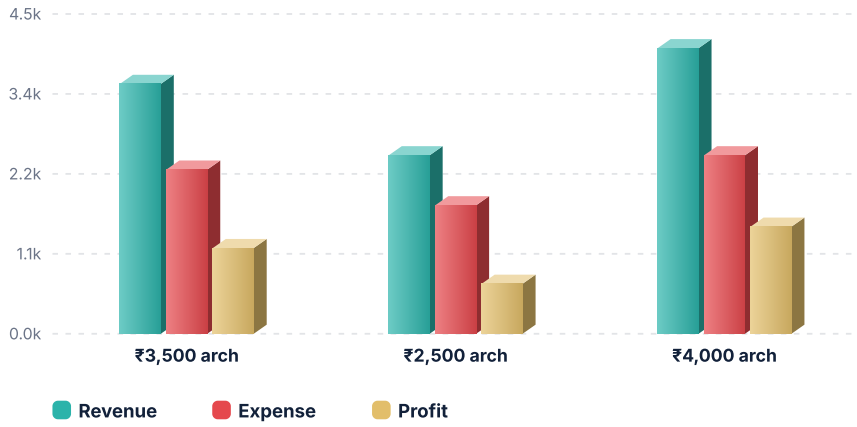

ECONOMICS

Per-event economics

How much do you **keep from a ₹3,500 arch**? Subtract the costs first.

Customer pays	−	Cost	=	Profit (1 event)
₹3,500		₹2,300		₹1,200

3D chart: at different price points

📌 **KEY POINTS**

- Profit margin is **~34%**; your own labour comes on top.
- At a **low rate such as ₹1,800** the margin is very thin.
- The more **premium the design**, the bigger the ticket.

ECONOMICS

When do you break even?

Break-even means recovering your initial investment. Formula: **Setup ÷ per-event profit**.

Profit / event	Lean (₹9,068)	Service-ready (₹23,164)
₹700	13 events	34 events
₹1,000	10 events	24 events
₹1,200 (base)	**8 events**	**20 events**
₹1,500	7 events	16 events
₹2,000	5 events	12 events

In the base roadmap

Once fixed costs are included, the **Level 2 investment is recovered in ~7 months** (page 59). In the low-booking scenario it is **not recovered even in 12 months** (page 61); so start with Level 1.

⚠️ **REALITY CHECK**

- This only shows when the **initial investment is recovered**. Whether bookings arrive depends on your marketing.

Yearly profit: 3D comparison

⚠️ **LESSON FROM THE LOW SCENARIO**

- With half the bookings the **setup is not recovered even in 12 months**
- Hence **start with Level 1**; move to Level 2 only when demand shows

ROADMAP · ANNUAL

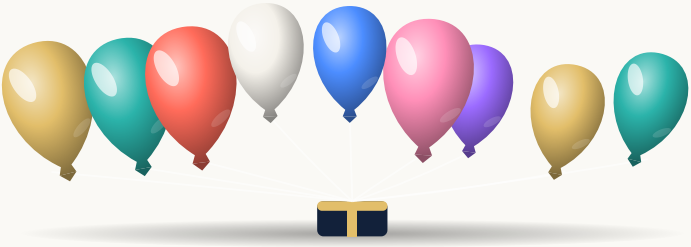

Opportunities through the year

Bookings are not equal every month. **Weddings and festivals** can lift demand, while **birthdays and family events** carry the other months. Below is an indicative calendar; build one for your own city.

Jan New Year parties	**Feb** Valentine's, weddings	**Mar** Holi, post-exams
Apr Summer birthdays	**May** Weddings + summer	**Jun** Slow: run offers
Jul Slow: build tie-ups	**Aug** Rakhi, Independence Day	**Sep** Ganesh, festivals
Oct Navratri, Diwali	**Nov** Wedding season	**Dec** Christmas, New Year

📌 **TIP**

- Post offers **2-3 weeks before** a festival
- Use slow months for **tie-ups and practice**

GROWTH

How to get customers

You do not need expensive ads. **Real photos and videos** are your biggest asset.

- **WhatsApp Status:** 10-second before/after video + starting rate
- **Instagram Reels:** balloons inflating, the arch coming together, the final reveal. Show real time
- **Tie-ups:** cake shop, photographer, planner, banquet, kids' store
- **3 colour options:** pastel pink-white, blue-white-gold, black-gold
- **Reviews:** a Google/WhatsApp review from every happy customer
- **Local groups:** share real work in Facebook/WhatsApp groups
- **Referral:** a discount for bringing a new customer

AVOID MISLEADING CLAIMS

- Claim '1-minute arch' or 'lakhs in income' only if you have an **actual demo and bills**

Follow us: Instagram · YouTube · Telegram

RISK & COMPLIANCE

Safety and quality

- Use **air-filled** balloons for most arches (helium is not required)
- Keep the pump's **ventilation openings clear**; never operate with wet hands
- Use a **weighted base** on frames; check wind outdoors
- Keep balloons away from **flames, hot lights and sharp objects**
- **Collect popped fragments** (choking risk for children)
- Do not attach anything to fragile walls **without permission**
- Carry spares: balloons, glue dots, tape, extension, scissors
- Written **scope, timing, advance and cancellation policy**

RISK & COMPLIANCE

Registration checklist

- Start as a **sole proprietorship**; keep a **PAN + separate bank account**
- **Udyam registration** is **free** on the government portal: udyamregistration.gov.in. Avoid paid look-alike sites
- **GST:** the general services threshold is **₹20 lakh** annual turnover (CBIC): GST FAQ. Confirm with a CA
- **Shop / trade licence:** check with your local municipal office
- Issue a **bill/receipt**; record advances and expenses

📌 **NOTE**

- Rules change. Confirm with a **CA or the official portal**.
- This plan is not tax or legal advice.

RISK & COMPLIANCE

Common mistakes and the right way

Avoid these mistakes

- Buying **too much stock** without bookings
- Selling an arch for **less than ₹1,800**
- Skipping the **base and safety check** on frames
- Not estimating **time and venue** conditions
- Confirming a date **without an advance**

The right way

- Record the **cost and revenue** of every job (job sheet)
- Keep **5-10% extra balloons**
- Show a **photo mockup first**
- Take an advance and **write a cancellation policy**
- Start small, learn, then scale

RISK & COMPLIANCE

Risks and mitigation

Risk	Impact	Mitigation
Low bookings	Slow payback	Test with Level 1, build tie-ups
Balloons popping	Arch looks poor	5-10% extra, sample test, avoid heat
Wrong pricing	Margin disappears	Cost every job
Wind / weak frame	Safety issue and damage	Weighted base, indoor first, site check
Last-minute cancellation	Wasted stock and time	Advance and written policy
Exaggerated claims	Loss of customer trust	Show only actual demos and photos
